

# MAVRA IQBAL MUCCADAM

Undergraduate Software Engineer

Email: [mavra.iqbal@muccadam.com](mailto:mavra.iqbal@muccadam.com) | Mobile: +92 332 6287222 | LinkedIn: [linkedin.com/in/mavra-iqbal-ba19b6278](https://www.linkedin.com/in/mavra-iqbal-ba19b6278)

## SUMMARY

Undergraduate full-stack developer skilled in building scalable web applications using React, Next.js, Node.js, and relational databases. Experienced in RESTful APIs, clean UI design, and data-driven solutions using Python and machine learning libraries.

## EDUCATION

**Ned University of Engineering and Technology- Bachelor of Software Engineering (BESE)** **2022-2026**  
**CGPA: 3.527/4.00**

**Relevant Coursework:**

*Courses: Data Structures and Algorithms, Object Oriented Programming, Database Management Systems, Software Development Life Cycle, Formal Methods in Software Engineering, Data Warehouse and Mining, Software Quality Engineering*

**Habib Girls' School (Pre-Engineering)** **2020-2022**

## PROFESSIONAL EXPERIENCE

**Exclerate – Data Analyst** **March 2025 – April 2025**

I worked on a live marketing project for GlobalShala's Superhero U event, where I analyzed Facebook ad campaign data to generate actionable insights. I developed impactful data visualizations and presented findings to support the Finance team in optimizing ad spend. Through this experience, I strengthened my analytical skills and enhanced my ability to collaborate effectively within a remote team using various visualization tools.

**EmpowerED Pakistan – Backend Developer** **September 2025 – October 2025**

I developed and integrated RESTful APIs to connect frontend interfaces with the backend, ensuring seamless data flow and enhanced functionality. I also updated and optimized MongoDB schemas by managing data modeling, insertion, and modification processes to support new and evolving application features.

**Plural Dynamics – React Developer** **September 2025 – January 2026**

As a React JS Intern at Plural Dynamics, I develop responsive, component-based web applications with a focus on performance optimization and seamless user experience. I collaborate with design and product teams to translate mockups into interactive interfaces, integrate APIs, maintain scalable code, and ensure cross-device responsiveness while adhering to best front-end development practices.

## PROJECTS

### BlockChain Based Counterfeit Medicine Detection and Ecommerce Store

- Built a decentralized web app using Ethereum, Solidity, and IPFS for secure medicine tracking, with MetaMask for role-based authentication. Integrated PostgreSQL, Next.js, and PayPro for e-commerce, and implemented AI-based anomaly detection for counterfeit prevention.

### Velora: AI Health Web App

- Developed a full-stack wellness app with Next.js, Firebase Auth, and Spline (3D avatars). Designed interactive UI modules (meal/exercise planners) with responsive layouts, animated loaders, and state management, following HCI principles.

### AgileKnot MasterPlan – A project management web system (Node.js & MySQL)

- A full-stack project management tool with Express.js, JWT auth, and MySQL. Implemented real-time analytics (Chart.js), task dependencies, and RESTful APIs, ensuring scalability and secure user/workspace management.

### AI Career Advice

- Created an ATS-friendly resume analyzer using React, Node.js, Express, and PostgreSQL. Features AI-driven scoring, content recommendations, and job matching, automating resume optimization for better job search outcomes.

### Employee Management System – Web Dashboard

- Developed a full-stack Employee Management System using the MERN stack with JWT authentication and role-based access (admin/employee), featuring task workflows, real-time updates, and a secure admin panel. Integrated an interactive dashboard with calendar support and implemented RESTful APIs for seamless data handling.

## SKILLS

**Technical Skills:** React.js, Hooks, Context API, React Router, State Management, Next.js, Server-side Rendering (SSR), Static Site Generation (SSG), API Routes, MERN Stack, MongoDB, Express.js, Node.js, RESTful APIs, Material-UI, Tailwind CSS, Responsive Design, MySQL, PostgreSQL, Python, Backend Scripting, API Development, Blockchain Integration, Github

**Soft Skills:** Active collaboration, Time management, Adaptability, Analytical thinking, Innovation

## CERTIFICATIONS

- Responsive WebsiteBasics: Code with HTML, CSS, and JavaScript
- Web 3.0 – NFTP Training
